Dear Hiring Manager,

I am excited to apply for the Business Data Analyst position at Accenture. With hands-on experience at Thomson Reuters in Business Intelligence, reporting automation, SQL, Power BI, Snowflake and ETL workflows, I believe my background aligns well with the requirements outlined in your job description.

In my current role at Thomson Reuters, I have built and optimized more than 240 Power BI dashboards, improved reporting efficiency through automation, and contributed to digital inventory reporting initiatives. I have worked extensively with SQL, Snowflake, Alteryx, DBT and Power Automate to streamline business processes, reduce manual effort and deliver accurate reporting solutions for stakeholders.

The opportunity at Accenture particularly interests me because it emphasizes Python. My experience collaborating with cross-functional teams, solving business problems through data analysis and delivering measurable process improvements would allow me to contribute effectively from day one.

I appreciate your time and consideration. I would welcome the opportunity to discuss how my technical skills, analytical mindset and business intelligence experience can contribute to your team's success.

Sincerely,

Anjali Mantri
